SUBJECT INDEX

Astrometry PAGE
First results of the Herstmonceux parallax programme, *D. V. Thomas* 335
Another look at the absolute proper motions obtained from the Lick pilot programme, *S. V. M. Clube* 445

Cosmology
The thermal future of the Universe, *P. C. W. Davies* 1
Cosmological information from surveys of radio source spectra, *B. L. Fanaroff and M. S. Longair* 393

Galactic structure and stellar dynamics
New M dwarfs in the South Galactic Cap, *D. H. P. Jones* 19P

Galaxies
Continuum radio emission from NGC 4656/7 and NGC 891 at 408 MHz, *J. E. Baldwin and G. G. Pooley* 127
Integrated magnitudes and colours of bright galaxies in the *UBV* system, *G. and A. de Vaucouleurs* (*Summary of Memoirs*, **77**, Part 1) 465
Dust in the core of the Small Magellanic Cloud, *W. L. Martin and A. D. Thackeray* ... 5P
A reassessment of the structure of the Seyfert galaxy NGC 4151, *R. D. Davies* 25P

General relativity
A measurement of the gravitational deflection of radio waves by the Sun during 1972 October, *J. M. Riley* 11P

Infra-red astronomy
Infra-red observations of young stars—I. Stars in young clusters, *M. Cohen* 85
Infra-red observations of young stars—II. T Tauri stars and the Orion population, *M. Cohen* 97
Infra-red observations of young stars—III. Nebulous emission-line stars, *M. Cohen* ... 105
Near infra-red magnitudes of 248 early-type emission-line stars and related objects, *D. A. Allen* 145
Observation and interpretation of the infra-red spectrum of Eta Carinae, *G. Robinson, A. R. Hyland and J. A. Thomas*... 281
Infra-red photometry of R Coronae Borealis type variables and related objects, *M. W. Feast and I. S. Glass* 293
A search for the Cygnus X-3 infra-red candidate at one micron, *J. E. Gaustad and B. Margon* 15P

Interstellar medium
A simple probabilistic theory of fragmentation, *R. B. Larson* 133
The interstellar spectrum of HD 154368, *J. C. Blades and P. D. Bennewith* 213
The heating of interstellar clouds by vibrationally excited molecular hydrogen, *T. P. Stecher and D. A. Williams* 305
Grain escape velocities from cool stars, *R. C. Gilman* 3P

Nebulae—gaseous
A numerical computation of the dynamical evolution of a supernova remnant, *I. Rosenberg and P. A. G. Scheuer* 27
A numerical model of the structure and evolution of young supernova remnants, *S. F. Gull* 47

Nebulae—planetary
A study of the radio continuum spectra of planetary nebulae, *L. A. Higgs* 313
High resolution observations of NGC 7027 at 5 GHz, *P. F. Scott* 35P

Physical processes
On the accretion mechanism for the formation of a protoplanetary disc, *C. Aust and M. M. Woolfson* 7
A numerical computation of the dynamical evolution of a supernova remnant, *I. Rosenberg and P. A. G. Scheuer* 27
A numerical model of the structure and evolution of young supernova remnants, *S. F. Gull* 47
A simple probabilistic theory of fragmentation, *R. B. Larson* 133
Viscous accretion flows and their uniqueness, *N. L. Balazs* 217
The heating of interstellar clouds by vibrationally excited molecular hydrogen, *T. P. Stecher and D. A. Williams* 305
Interpretation of hydrogen quadrupole and methane observations of Jupiter and the radiative properties of the visible clouds, *G. E. Hunt* 347
Grain escape velocities from cool stars, *R. C. Gilman* 3P
The pulse energy distribution in pulsars, *F. G. Smith* 9P

Planetary system
On the accretion mechanism for the formation of a protoplanetary disc, *C. Aust and M. M. Woolfson* 7
Radio-echo measurements of the flux of the Quadrantid, Perseid and Geminid meteor streams, *D. W. Hughes* 113
Interpretation of hydrogen quadrupole and methane observations of Jupiter and the radiative properties of the visible clouds, *G. E. Hunt* 347

Pulsars
The pulse energy distribution in pulsars, *F. G. Smith* 9P

Radio astronomy
A numerical model of the structure and evolution of young supernova remnants, *S. F. Gull* 47
Continuum radio emission from NGC 4656/7 and NGC 891 at 408 MHz, *J. E. Baldwin and G. G. Pooley* 127
Observations of 3C 129, 3C 129·1 and 3C 83·1B at 2·7 and 5 GHz, *J. M. Riley*... 167
A survey of the radio background at 38 MHz, *J. Milogradov-Turin and F. G. Smith* 269
A study of the radio continuum spectra of planetary nebulae, *L. A. Higgs* 313
Cosmological information from surveys of radio source spectra, *B. L. Fanaroff and M. S. Longair* 393
The pulse energy distribution in pulsars, *F. G. Smith* 9P

PAGE

A measurement of the gravitational deflection of radio waves by the Sun during 1972 October, *J. M. Riley* 11P
A reassessment of the structure of the Seyfert galaxy NGC 4151, *R. D. Davies* 25P
Depolarization in flat-spectra quasars, *A. G. Pacholczyk and S. A. Gregory* 31P
High resolution observations of NGC 7027 at 5 GHz, *P. F. Scott* 35P

Spectroscopy
The spectrum of the beat cepheid U TrA, *A. W. Rodgers and R. A. Gingold* 23
The interstellar spectrum of HD 154368, *J. C. Blades and P. D. Bennewith* 213
Observation and interpretation of the infra-red spectrum of Eta Carinae, *G. Robinson, A. R. Hyland and J. A. Thomas*... 281
Interpretation of hydrogen quadrupole and methane observations of Jupiter and the radiative properties of the visible clouds, *G. E. Hunt* 347
LkHα 101—not a northern η Carinae?, *D. A. Allen* 1P

Stars—atmospheres of
The envelopes of Be stars, *C. R. Kitchin* 381
Some measurements of Be stars envelopes, *C. R. Kitchin* 389
A model atmosphere analysis of the super-supergiant HR 5171, *P. R. Warren* 427

Stars—binary
The spectroscopic orbit of HD 90707, *T. L. Evans* 15
Beta Canis Majoris: period analysis of recent photometry and published radial velocities, *R. R. Shobbrook* 257

Stars—chemical composition
On the atmospheric abundances of seven Am SB_2 systems, *D. J. Stickland* 193
An abundance analysis of the F-type giant HD 116745 in the globular cluster Omega Centauri, *R. J. Dickens and A. L. T. Powell* 249

Stars—magnetic
The adiabatic stability of stars containing magnetic fields—I. Toroidal fields, *R. J. Tayler*... 365

Stars—photometry of
Infra-red observations of young stars—I. Stars in young clusters, *M. Cohen* 85
Infra-red observations of young stars—II. T Tauri stars and the Orion population, *M. Cohen* 97
Infra-red observations of young stars—II. Nebulous emission-line stars, *M. Cohen* 105
Near infra-red magnitudes of 248 early-type emission-line stars and related objects, *D. A. Allen* 145
Beta Canis Majoris: period analysis of recent photometry and published radial velocities, *R. R. Shobbrook* 257
Infra-red photometry of R Coronae Borealis type variables and related objects, *M. W. Feast and I. S. Glass* 293
Multicolour observations of UZ Librae, *W. Z. Wisniewski* 331
On the *UBVRI* colours of strong-line G dwarfs and subgiants, *D. Branch and J. B. Alexander* 409
Dust in the core of the Small Magellanic Cloud, *W. L. Martin and A. D. Thackeray*... ... 5P

Stars—structure and evolution of
Models for rapidly rotating pre-main sequence stars, *D. L. Moss* 225
A modified Lucy model for W Ursae Majoris systems, *D. L. Moss and J. A. J. Whelan* ... 239

Stars—variable
The spectrum of the beat cepheid U TrA, *A. W. Rodgers and R. A. Gingold* 23
Type I supernovae, *D. Branch and B. Patchett* 71
Infra-red photometry of R Coronae Borealis type variables and related objects, *M. W. Feast and I. S. Glass* 293
Period changes in β Cephei stars: comparison of observations with theory, *P. P. Eggleton and J. R. Percy* 421

Sun
Solar activity and *XUV* emission, *C. W. Allen and Shahinaz Yousef* 181

X-ray astronomy
A search for the Cygnus X-3 infra-red candidate at one micron, *J. E. Gaustad and B. Margon* 15P

MONTHLY NOTICES

OF THE

ROYAL ASTRONOMICAL SOCIETY

CONTAINING

PAPERS PUBLISHED IN THE PERIOD
1973 MAY TO 1973 JUNE

VOL. 162

Published for the Royal Astronomical Society by
Blackwell Scientific Publications
Oxford London Edinburgh Melbourne

PAGE

Celestial mechanics
Mass and position limits for an hypothetical tenth planet of the solar system, *D. Rawlins and M. Hammerton* 261
The cause of the residuals in the motion of Halley's Comet, *T. Kiang* 271

Cosmology
Do number counts tell us anything about the distribution of distant sources?, *R. F. Carswell* 61
Evidence for luminosity evolution of quasars, *N. V. Zotov and W. Davidson* 127
The rotation and distortion of the Universe, *C. B. Collins and S. W. Hawking* 307
On the interpretation of the redshift-angular size diagram for quasars, *J. C. Jackson* ... 11P

Galactic structure and stellar dynamics
Theories of galactic spiral structure—comparisons with observations, *J. H. Piddington* ... 73

Galaxies
New observations of two compact galaxies, *M. V. Penston and M. J. Penston*... 109
An attempt to detect radio emission from Markarian galaxies at 408 MHz, *P. Thomasson and V.H. Malumian* 295
The *V–K* colours of the nuclei of bright galaxies, *M. V. Penston* 359
QSO's near bright galaxies, *I. W. A. Browne and N. J. McEwan* 21P
Interstellar obscuration in the direction of Maffei 1 and 2, *K. Nandy and F. Smriglio* ... 25P
Infra-red observations of NGC 7552 and NGC 7582 and their identification with PKS radio sources, *I. S. Glass* 35P

PAGE

Infra-red astronomy
Infra-red observations of NGC 7552 and NGC 7582 and their identification with PKS radio sources, *I. S. Glass* 35P

Interstellar medium
Radio scintillations due to plasma irregularities with power law spectra: the interstellar medium, *L. T. Little and D. N. Matheson* 329
Interstellar obscuration in the direction of Maffei 1 and 2, *K. Nandy and F. Smriglio* ... 25P

Nebulae—gaseous
Interpretation of the radio emission from the supernova remnants Cas A and 3C 10, *S. F. Gull* 135
5 GHz observations of small-scale structure in DR 21, *S. Harris* 5P

Physical processes
The scattering of resonance-line radiation in the limit of large optical depth, *J. P. Harrington* 43
Luminosity of thermal X-ray sources with a strong magnetic field, *Yu. N. Gnedin and R. A. Sunyaev* 53
On the polarization of the interstellar OH-emission, *L. M. Hall and D. ter Haar* 97
Circular polarization by single scattering of unpolarized light from loss-less, non-spherical particles, *L. W. Bandermann and J. C. Kemp* 367

Planetary system
Mass and position limits for an hypothetical tenth planet of the solar system, *D. Rawlins and M. Hammerton* 261
The cause of the residuals in the motion of Halley's Comet, *T. Kiang* 271

Quasars
Identification of the 5C3 radio sources, *A. G. Parkes and M. V. Penston* 117
Evidence for luminosity evolution of quasars, *N. V. Zotov and W. Davidson* 127
On the interpretation of the redshift-angular size diagram for quasars, *J. C. Jackson* ... 11P
QSO's near bright galaxies, *I. W. A. Browne and N. J. McEwan* 21P
Spectroscopic and photometric observations of the quasar 4C 31.63, *K. P. Tritton, S. N. Henbest and M. V. Penston* 31P

Radio astronomy
The velocity of separation of the components of extragalactic radio sources, *C. D. Mackay* ... 1
Do number counts tell us anything about the distribution of distant sources?, *R. F. Carswell* 61
On the polarization of the interstellar OH-emission, *L. M. Hall and D. ter Haar* 97
Identification of the 5C3 radio sources, *A. G. Parkes and M. V. Penston* 117
Interpretation of the radio emission from the supernova remnants Cas A and 3C 10, *S. F. Gull* 135
An attempt to detect radio emission from Markarian galaxies at 408 MHz, *P. Thomasson and V. H. Malumian* 295
Radio scintillations due to plasma irregularities with power law spectra: the interstellar medium, *L. T. Little and D. N. Matheson* 329
On the interpretation of the redshift-angular size diagram for quasars, *J. C. Jackson*... ... 11P
5 GHz observations of small-scale structure in DR 21, *S. Harris* 5P
QSO's near bright galaxies, *I. W. A. Browne and N. J. McEwan* 21P
Spectroscopic and photometric observations of the quasar 4C 31.63, *K. P. Tritton, S. N. Henbest and M. V. Penston* 31P
Infra-red observations of NGC 7552 and NGC 7582 and their identification with PKS radio sources, *I. S. Glass* 35P

Spectroscopy
Spectroscopic observations of M giant stars at the South Galactic Pole, *D. Crampton and T. L. Evans* 11
The scattering of resonance-line radiation in the limit of large optical depth, *J. P. Harrington* 43
On the dependence of the two-level source function on its own radiation field, *R. Steinitz and R. A. Shine* 197
On the possibility of determining stellar radial velocities to 0·01 km s^{-1}, *R. and R. Griffin* ... 243
Accurate wavelengths of stellar and telluric absorption lines near λ 7000 Å, *R. and R. Griffin* 255
The relative importance of Rayleigh scattering by atoms and negative ion absorption in the atmospheres of late-type stars, *S. P. Tarafdar and M. S. Vardya* 299
Spectral line formation in extended atmospheres—II, *A. Peraiah* 321

PAGE

Stars—atmospheres of
The atmosphere of epsilon Leonis, *P. M. Williams* 235
The relative importance of Rayleigh scattering by atoms and negative ion absorption in the atmospheres of late-type stars, *S. P. Tarafdar and M. S. Vardya* 299

Stars—binary
A low-mass primary for Cygnus X-1?, *V. Trimble, W. K. Rose and J. Weber* 1P

Stars—chemical composition of
The carbon abundance and colours of Delta Pavonis, *R. A. Bell* 37
The abundances of the elements in the oldest disk stars, *J. B. Hearnshaw* (*Summary of Memoirs*, Volume 77, Part 2) 401

Stars—clusters of
Periods for two variables in M13, *W. Osborn* 91
Photometry of southern globular clusters—I. Bright stars in ω Centauri, *R. D. Cannon and R. S. Stobie* 207
Photometry of southern globular clusters—II. Bright stars in NGC 6752, *R. D. Cannon and R. S. Stobie* 227

Stars—magnetic fields in
The magnetohydrodynamic stability of white dwarfs and neutron stars, *R. J. Tayler* ... 17
Magnetic fields in rapidly rotating stars, *M. Maheswaran and H. A. B. M. de Silva* 289
Pinch instabilities in magnetic stars, *G. A. E. Wright* 339

Stars—photometry of
Photometry of southern globular clusters—I. Bright stars in ω Centauri, *R. D. Cannon and R. S. Stobie* 207
Photometry of southern globular clusters—II. Bright stars in NGC 6752, *R. D. Cannon and R. S. Stobie* 227

Stars—variable
The Beta Canis Majoris stars 15 CMa and ξ^1 CMa, *R. R. Shobbrook* 25
Periods for two variables in M13, *W. Osborn* 91
Non-linear pulsations of upper main sequence stars—I. A perturbation approach, *J. C. B. Papaloizou* 143
Non-linear pulsations of upper main sequence stars—II. Direct numerical integrations, *J. C. B. Papaloizou* 169
On the masses of cataclysmic variable stars, *B. Warner* 189
The period–radius relation for cepheid variable stars, *R. Woolley and B. Carter* 379
HD 153919 and the X-ray source 2 U 1700–37, *E. N. Walker* 15P

X-ray astronomy
Luminosity of thermal X-ray sources with a strong magnetic field, *Yu. N. Gnedin and R. A. Sunyaev* 53
A low-mass primary for Cygnus X-1?, *V. Trimble, W. K. Rose and J. Weber* 1P
HD 153919 and the X-ray source 2 U 1700–37, *E. N. Walker* 15P

SUBJECT INDEX

PAGE

Data reduction
An entropy measure for partially polarized radiation and its application to estimating radio sky polarization distributions from incomplete ' aperture synthesis ' data by the maximum entropy method, *J. E. B. Ponsonby* 369

Galaxies
Magellanic Cloud investigations—IV. The LMC blue globular cluster NGC 1850, *W. G. Tifft and L. P. Connolly* 93
High resolution observations of neutral hydrogen in M33—II. The velocity field, *P. J. Warner, M. C. H. Wright and J. E. Baldwin* 163

PAGE

Infra-red astronomy
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen, *I. S. Glass and M. W. Feast* 245

Instruments and techniques
The ultra-violet sky-survey telescope in the TD-1A satellite, *A. Boksenberg, R. G. Evans, R. G. Fowler, I. S. K. Gardner, L. Houziau, C. M. Humphries, C. Jamar, D. Macau, D. Malaise, A. Monfils, K. Nandy, G. I. Thompson, R. Wilson and H. Wroe* 291
Wide field Cassegrain telescopes, *C. G. Wynne* 357

Interstellar medium
The equilibrium of an interstellar magnetic gas cloud, *D. A. Parker* 41
Segregation of grains in interstellar clouds, *Gp. Horedt*... 285
Pulse broadening due to multiple scattering in the interstellar medium—II., *I. P. Williamson* 345

Meteors
The effect of departures from classical meteor ablation theory on the incident flux of shower meteors deduced from radio-echo observations, *L. M. G. Poole* 129
The Giacobinid (Draconid) meteor shower, 1972, *David W. Hughes and D. A. Thompson* ... 3P

Nebulae—gaseous
Observations of NGC 7538 at 2·7 and 5 GHz, *A. H. M. Martin* 141

Night sky light
Observations of the linearly polarized intensity of the night sky radiation in the anti-solar hemisphere, *R. D. Wolstencroft and L. W. Bandermann* 229

Physical processes
The equilibrium of an interstellar magnetic gas cloud, *D. A. Parker* 41
Probabilistic model for radiative transfer problems in spherical shell media with complete redistribution in frequency, *T. K. Leong and K. K. Sen* 105
The importance of molecular Rayleigh scattering in the atmospheres of very late-type stars, *S. P. Tarafdar and M. S. Vardya* 261
Segregation of grains in interstellar clouds, *Gp. Horedt* 285
The behaviour of dust under the influence of radiation pressure and gravity, *H. Bondi and P. D. Noerdlinger* 401
Circular repolarization in compact radio sources, *A. G. Pacholczyk* 29P

Pulsars
The drifting sub-pulse phenomenon in PSR 0809+74, *C. G. Page* 29
Pulse broadening due to multiple scattering in the interstellar medium—II, *I. P. Williamson* 345

Radio astronomy
The drifting sub-pulse phenomenon in PSR 0809+74, *C. G. Page* 29
Observations of NGC 7538 at 2·7 and 5 GHz, *A. H. M. Martin* 141
Linear polarization of the region round $l = 140°$, $b = +8°$ at 240·5 MHz, *A. Wilkinson* ... 147
High resolution observations of neutral hydrogen in M33—II. The velocity field, *P. J. Warner, M. C. H. Wright and J. E. Baldwin* 163
Pulse broadening due to multiple scattering in the interstellar medium—II, *I. P. Williamson* 345
An entropy measure for partially polarized radiation and its application to estimating radio sky polarization distributions from incomplete 'aperture synthesis' data by the maximum entropy method, *J. E. B. Ponsonby* 369
Observations of extragalactic variable sources at 2·8 and 4·5 cm wavelength, *W. J. Medd, B. H. Andrew, G. A. Harvey and J. L. Locke* (*Summary of Memoirs*, Volume 77, Part 3) 437
High resolution observations of the extragalactic radio sources 3C 52 and 3C 192, *Anthony Harris* 19P
Circular repolarization in compact radio sources, *A. G. Pacholczyk* 29P

Spectroscopy
Probabilistic model for radiative transfer problems in spherical shell media with complete redistribution in frequency, *T. K. Leong and K. K. Sen* 105

Stars
The abundance and age distributions of 500 F stars in the solar neighbourhood, *R. E. S. Clegg and R. A. Bell* 13

PAGE

Stars—atmospheres of
The importance of molecular scattering in the atmospheres of very late-type stars, *S. P. Tarafdar and M. S. Vardya* 261

Stars—binary
HD 187399: a binary with case B mass-exchange?, *J. B. Hutchings and Russell O. Redman* 209
W Ursae Majoris: the parameters of a contact binary, *S. P. Worden and J. Whelan* 391
Spectroscopy of HD 153919 (= 2U 1700–37), *J. B. Hutchings, A. D. Thackeray, B. L. Webster and P. J. Andrews* 13P

Stars—chemical composition of
The abundance and age distributions of 500 F stars in the solar neighbourhood, *R. E. S. Clegg and R. A. Bell* 13
The iron, carbon and nitrogen abundances of the subdwarf Groombridge 1830, *J. Tomkin and R. A. Bell* 117
Early inhomogeneities of composition and the solar neutrino problem, *A. J. R. Prentice* ... 331
Lithium in K-supergiants, *P. R. Warren* 337

Stars—clusters of
Magellanic Cloud investigations—IV. The LMC blue globular cluster NGC 1850, *W. G. Tifft and L. P. Connolly* 93
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen, *I. S. Glass and M. W. Feast* 245
On an apparent discontinuity in the properties of giants of the disk population, *T. Lloyd Evans* 1P

Stars—magnetic fields in
The adiabatic stability of stars containing magnetic fields—II. Poloidal fields, *A. Markey and R. J. Tayler* 77
The oblique rotator model of magnetic stars, *J. J. Monaghan* 423

Stars—photometry of
Ultra-violet photometry of early type stars from TD1 satellite observations, *C. M. Humphries, K. Nandy and G. I. Thompson* 1
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen, *I. S. Glass and M. W. Feast* 245
Photoelectric photometry of 47 Tuc, *J. Menzies* 323
On an apparent discontinuity in the properties of giants of the disk population, *T. Lloyd Evans* 1P

Stars—spectroscopy of
A spectroscopic survey of Southern Hemisphere white dwarfs—II. Spectroscopic data for forty-one southern white dwarfs, *G. Wegner* 381
Molecules and the 1720 Å feature in hot supergiants, *S. P. Tarafdar and M. S. Vardya* ... 35P

Stars—structure and evolution of
A numerical treatment of double shell source stars, *P. P. Eggleton* 279

Stars—variable
Systematic errors in cepheid temperatures and pulsational masses, *E. G. Schmidt* 67
HD 173219. A periodic Be star, *J. B. Hutchings and Russell O. Redman* 219
29-second oscillations in CD −42° 14462, *Brian Warner* 25P

Sun
Equatorial currents in the photosphere, *H. H. Plaskett* 183
Early inhomogeneities of composition and the solar neutrino problem, *A. J. R. Prentice* ... 331

Ultra-violet astronomy
Ultra-violet photometry of early type stars from TD1 satellite observations, *C. M. Humphries K. Nandy and G. I. Thompson* 1
The ultra-violet sky-survey telescope in the TD-1A satellite, *A. Boksenberg, R. G. Evans, R. G. Fowler, I. S. K. Gardner, L. Houziau, C. M. Humphries, C. Jamar, D. Macau, D. Malaise, A. Monfils, K. Nandy, G. I. Thompson, R. Wilson and H. Wroe* 291

X-ray astronomy
Spectroscopy of HD 153919 (= 2U 1700–37), *J. B. Hutchings, A. D. Thackeray, B. L. Webster and P. J. Andrews* 13P

SUBJECT INDEX

PAGE

Astrometry
Astrometry with the 5-km radio telescope, *M. Ryle and B. Elsmore* 223
The position of β Persei, *R. H. Tucker, B. D. Yallop, A. N. Argue, C. M. Kenworthy, B. Elsmore and M. Ryle* 27P

Celestial mechanics
Solar tidal friction and satellite loss, *William R. Ward and Mark J. Reid* 21

Galactic structure and stellar dynamics
Time variations of the velocity distribution due to phase mixing, *John Byl and Michael W. Ovenden* 289

Galaxies
The *JHKL* colours of galaxies, *I. S. Glass* 155
Multiple explosions and the evolution of radio galaxies, *W. A. Christiansen* 211
Study of OB-Stars in the Large Magellanic Cloud, *K. Nandy, R. J. Dodd, and R. D. Wolstencroft* 43P

PAGE

Infra-red astronomy
Interpretation of far infra-red emission from interstellar grains, *L. J. Caroff, Vahe Petrosian, E. E. Salpeter, R. V. Wagoner and M. W. Werner* 295
Infra-red observations of young stars—IV. Radiative mechanisms and interpretations, *Martin Cohen* 395
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen—Erratum, *I. S. Glass and M. W. Feast* 423
The detection of M15 at 10·2 μ, *A. D. MacGregor, J. P. Phillips and M. J. Selby* 31

Instruments and techniques
An investigation of the effects of change of component separation on the image quality of a spectrographic camera, *C. F. W. Harmer* 179
On the application of automation to the measurement and reduction of high dispersion stellar spectra, *B. E. Patchett, A. McCall and D. J. Stickland* 329

Interstellar medium
Interpretation of far infra-red emission from interstellar grains, *F. J. Caroff, Vahe Petrosian, E. E. Salpeter, R. V. Wagoner and M. W. Werner* 295
The mass distribution of objects undergoing collisions, with applications to interstellar H I clouds, *L. G. Taff and Malcolm P. Savedoff* 357

Nebulae—gaseous
On the non-spherical structure of the nova nebulosity, *Warren M. Sparks and Sumner Starrfield* 1P
The nature of a nebulous object in the Chamaeleon T association, *M. W. Feast and I. S. Glass* 35P
The radio spectrum of IC 443, *I. E. Hill* 39P

Nebulae—planetary
The ionization structure of planetary nebulae—X. The contribution of charge exchange and optically thick condensations to [O I] radiation, *Robert E. Williams* 111
Planetary nebulae: two types, *Haywood Smith* 321

Physical processes
Multiple explosions and the evolution of radio galaxies, *W. A. Christiansen* 211
Models of extended radio sources, *M. S. Longair, M. Ryle and P. A. G. Scheuer* 243
Interpretation of far infra-red emission from interstellar grains, *L. J. Caroff, Vahe Petrosian, E. E. Salpeter, R. V. Wagoner and M. W. Werner* 295
The spotted flare stars BY Dra and CC Eri: a model for the spots and some astrophysical implications, *Bernard W. Bopp and David S. Evans* 343
The mass distribution of objects undergoing collisions, with applications to interstellar H I clouds, *L. G. Taff and Malcolm P. Savedoff* 357
Infra-red observations of young stars—IV. Radiative mechanisms and interpretations, *Martin Cohen* 395

Planetary system
Solar tidal friction and satellite loss, *William R. Ward and Mark J. Reid* 21

Quasars
On the angular distribution of complete samples of bright quasi-stellar and unidentified radio sources, *S. H. Plagemann*... 303

Radio astronomy
Multiple explosions and the evolution of radio galaxies, *W. A. Christiansen* 211
Astrometry with the 5-km radio telescope, *M. Ryle and B. Elsmore* 223
Models of extended radio sources, *M. S. Longair, M. Ryle and P. A. G. Scheuer* 243
New observations of 3C 382, 3C 452 and 3C 465 at 2·7 and 5 GHz, *J. M. Riley and N. J. B. A. Branson* 271
On the angular distribution of complete samples of bright quasi-stellar and unidentified radio sources, *S. H. Plagemann* 303
The position of β Persei, *R. H. Tucker, B. D. Yallop, A. N. Argue, C. M. Kenworthy, B. Elsmore and M. Ryle* 27P
The radio spectrum of IC 443, *I. E. Hill* 39P

PAGE

Spectroscopy
On the application of automation to the measurement and reduction of high dispersion stellar spectra, *B. E. Patchett, A. McCall and D. J. Stickland* 329

Stars—atmospheres of
The calculation of flux constant line-blanketed model atmospheres for solar type stars, *R. A. Bell* 197

Stars—binary
A reflection model for eclipsing binary stars, *David B. Wood* 53
The binary system 57 Cygni—apsidal motion and effects of spectral line blending, *R. W. Hilditch* 101

Stars—chemical composition of
The horizontal branch and the cosmic abundance of helium, *Peter G. Gross* 65
Nitrogen enrichment due to meridional circulation in main sequence stars, *Pierre Demarque and Robert D. McClure* 5P
A carbon star in NGC 2477, *R. M. Catchpole and M. W. Feast* 11P
Carbon stars in the SMC globular clusters NGC 121, NGC 419 and Kron 3, *M. W. Feast and T. Lloyd Evans* 15P

Stars—clusters of
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen—Erratum, *I. S. Glass and M. W. Feast* 423
A carbon star in NGC 2477, *R. M. Catchpole and M. W. Feast* 11P
Carbon stars in the SMC globular clusters NGC 121, NGC 419 and Kron 3, *M. W. Feast and T. Lloyd Evans* 15P
The detection of M15 at 10·2 μ, *A. D. MacGregor, J. P. Phillips and M. J. Selby* 31P
The nature of a nebulous object in the Chamaeleon T association, *M. W. Feast and I. S. Glass* 35P

Stars—magnetic fields in
Stars in radiative equilibrium containing multipole magnetic fields, *D. L. Moss* 33

Stars—photometry of
Photoelectric *UBV* photometry of stars in ten selected areas, *Margaret J. Penston* 121
Photoelectric *UBV* observations made on the Palomar 20-in. telescope, *Margaret J. Penston* ... 133
Infra-red photometry of red giants in the globular clusters 47 Tuc and ω Cen—Erratum, *I. S. Glass and M. W. Feast* 423
Study of OB-stars in the Large Magellanic Cloud by *UBV* photometry, *K. Nandy, R. J. Dodd and R. D. Wolstencroft* 43P

Stars—spectroscopy of
Problems with strong-line G and K dwarfs, *J. B. Alexander and David Branch* 19P

Stars—structure and evolution of
The structure of rotating stars: the J^2 method and results for uniform rotation, *J. C. B. Papaloizou and J. A. J. Whelan* 1
The evolution of a horizontal branch Population II star with total mass 0·63 $M_\odot$, *P. G. Laskerides* 169
Nitrogen enrichment due to meridional circulation in main sequence stars, *Pierre Demarque and Robert D. McClure* 5P

Stars—variable
Wolf 424: A neglected flare star, *Thomas J. Moffett* 11
The spotted flare stars BY Dra and CC Eri: a model for the spots and some astrophysical implications, *Bernard W. Bopp and David S. Evans* 343
Henize 177—slow nova, symbiotic star, X-ray source?, *B. Louise Webster* 381
Some small amplitude red variables of the disk and halo populations, *O. J. Eggen* (*Summary of Memoirs*, Volume 77, Part 4) 425

X-ray astronomy
Henize 177—slow nova, symbiotic star, X-ray source?, *B. Louise Webster* 381

MONTHLY NOTICES

OF THE

ROYAL ASTRONOMICAL SOCIETY

CONTAINING

PAPERS PUBLISHED IN THE PERIOD
1973 NOVEMBER TO 1973 DECEMBER

VOL. 165

Published for the Royal Astronomical Society by
Blackwell Scientific Publications

SUBJECT INDEX

PAGE

Celestial mechanics
The inclination-type resonance of Mimas and Tethys, *Richard Greenberg* 305
Asteroid nutation angles, *Joseph A. Burns and V. S. Safronov* 403
Eccentricity and inclination of Miranda's orbit, *E. A. Whitaker and R. J. Greenberg* ... 15P

Cosmology
Magnetic fields in the early Universe, *E. R. Harrison* 185
The cosmological principle in Newtonian universes, *A. B. Evans and W. Davidson* 323

Galaxies
Neutral hydrogen in galaxies of early and other types, *B. M. Lewis and R. D. Davies* ... 213
Neutral hydrogen in Virgo cluster galaxies, *R. D. Davies and B. M. Lewis* 231
Identification of extended southern radio sources, *K. P. Tritton and R. T. Schilizzi* ... 245
Identifications of southern Parkes radio sources, *K. P. Tritton and D. P. D. Whitworth* ... 253
The radio galaxy 3C 66, *K. J. E. Northover* 369
The stability of the M87 jet, *S. E. Okoye* 393
The rotation curve and mass distribution in M31, *D. T. Emerson and J. E. Baldwin* 9P

General relativity
The pressure–volume relation of isothermal gas spheres within the framework of general relativity, *S. Yabushita* 11
Pulsational instability of isothermal gas spheres within the framework of general relativity, *S. Yabushita* 17

Infra-red astronomy
Infra-red photometry of RR Telescopii and other emission-line objects, *I. S. Glass and B. Louise Webster* 77
Dust temperatures around hot stars, *D. A. Allen and M. V. Penston* 121
Southern infra-red standards and the absolute calibration of infra-red photometry, *J. A. Thomas, A. R. Hyland and G. Robinson* 201
Some features of the infra-red spectrum of NGC 7027 and an estimate of its sulphur abundance, *D. K. Aitken and B. Jones* 363

PAGE

Instruments and techniques
A phase correction technique for radio link interferometry, *R. J. Peckham* 25
Data for some four-lens paraboloid field correctors, *C. G. Wynne* 1P

Interstellar medium
Radio recombination line emission from the galactic plane, *H. E. Matthews, A. Pedlar and R. D. Davies* 149
Recombination line emission from the galactic centre, *H. E. Matthews, R. D. Davies and A. Pedlar* 173
Interstellar absorption of the low energy X-rays from the Crab Nebula, *P. A. Charles, J. L. Culhane and I. R. Tuohy* 355

Nebulae—gaseous
Interstellar absorption of the low energy X-rays from the Crab Nebula, *P. A. Charles, J. L. Culhane and I. R. Tuohy* 355
H166α studies of the Rosette and North America nebulae, *A. Pedlar and H. E. Matthews* ... 381
A synchrotron model for the continuum spectrum of the Crab Nebula, *B. J. Burn* 421

Nebulae—planetary
Some features of the infra-red spectrum of NGC 7027 and an estimate of its sulphur abundance, *D. K. Aitken and B. Jones* 363

Physical processes
The pressure–volume relation of isothermal gas spheres within the framework of general relativity, *S. Yabushita* 11
Pulsational instability of isothermal gas spheres within the framework of general relativity, *S. Yabushita* 17
Convection in rotating stars, *R. J. Tayler* 39
Dust temperatures around hot stars, *D. A. Allen and M. V. Penston* 121
Magnetic fields in the early Universe, *E. R. Harrison* 185
Planetary formation by the accumulation of sub-condensations, *I. P. Williams and J. R. Donnison* 295
The stability of the M87 jet, *S. E. Okoye* 393
Inverse Compton X-ray generation in QSS and the distance problem, *S. E. Okoye* 413
A synchrotron model for the continuum spectrum of the Crab Nebula, *B. J. Burn* 421

Planetary system
Planetary formation by the accumulation of sub-condensations, *I. P. Williams and J. R. Donnison* 295
The inclination-type resonance of Mimas and Tethys, *Richard Greenberg* 305
Asteroid nutation angles, *Joseph A. Burns and V. S. Safronov* 403
Eccentricity and inclination of Miranda's orbit, *E. A. Whitaker and R. J. Greenberg* 15P

Pulsars
Pulsar flux density variations and spectra, *A. I. O. McLean* 133

Quasars
Excitation of C II] λ2326, O III] λ1644 and other semi-forbidden emission lines in quasars, *A. R. G. Jackson* 53
Identification of extended southern radio sources, *K. P. Tritton and R. T. Schilizzi* 245
Identifications of southern Parkes radio sources, *K. P. Tritton and D. P. D. Whitworth* ... 253
Inverse Compton X-ray generation in QSS and the distance problem, *S. E. Okoye* 413

Radio astronomy
A phase correction technique for radio link interferometry, *R. J. Peckham* 25
Pulsar flux density variations and spectra, *A. I. O. McLean* 133
Radio recombination line emission from the galactic plane, *H. E. Matthews, A. Pedlar and R. D. Davies* 149
Recombination line emission from the galactic centre, *H. E. Matthews, R. D. Davies and A. Pedlar* 173
Neutral hydrogen in galaxies of early and other types, *B. M. Lewis and R. D. Davies* ... 213
Neutral hydrogen in Virgo cluster galaxies, *R. D. Davies and B. M. Lewis* 231
Identification of extended southern radio sources, *K. P. Tritton and R. T. Schilizzi* 245

PAGE

Identifications of southern Parkes radio sources, *K. P. Tritton and D. P. D. Whitworth* ... 253
Extragalactic radio sources with steep low frequency spectra, *J. E. Baldwin and P. F. Scott* 259
The radio galaxy 3C 66, *K. J. E. Northover* 369
H166α studies of the Rosette and North America nebulae, *A. Pedlar and H. E. Matthews* ... 381
A synchrotron model for the continuum spectrum of the Crab Nebula, *B. J. Burn* 421
The rotation curve and mass distribution in M31, *D. T. Emerson and J. E. Baldwin* ... 9P

Spectroscopy
Excitation of C II] λ2326, O III] λ1644 and other semi-forbidden emission lines in quasars, *A. R. G. Jackson* 53

Stars—binary
Absolute magnitudes of B-type primaries in visual binaries, *P. J. Andrews and A. D. Thackeray* 1
A spectroscopic survey of Southern Hemisphere white dwarfs—III. Binaries containing a white dwarf, *Gary Wegner* 271

Stars—chemical composition of
Stellar CN band strengths and the abundance of nitrogen, *D. L. Harmer and B. E. J. Pagel* 91

Stars—photometry of
Absolute magnitudes of B-type primaries in visual binaries, *P. J. Andrews and A. D. Thackeray* 1
Infra-red photometry of RR Telescopii and other emission-line objects, *I. S. Glass and B. Louise Webster* 77
Southern infra-red standards and the absolute calibration of infra-red photometry, *J. A. Thomas, A. R. Hyland and G. Robinson* 201
Absolute magnitudes of semi-regular variables in the solar vicinity from statistical parallaxes, *Z. Aslan* 337

Stars—spectroscopy of
Stellar CN band strengths and the abundance of nitrogen, *D. L. Harmer and B. E. J. Pagel* 91
A spectroscopic survey of Southern Hemisphere white dwarfs—III. Binaries containing a white dwarf, *Gary Wegner* 271

Stars—structure and evolution of
Convection in rotating stars, *R. J. Tayler* 39

Stars—variable
Optical fluctuations of Scorpius X-1, *Alfred Frohlich* 313
Absolute magnitudes of semi-regular variables in the solar vicinity from statistical parallaxes, *Z. Aslan* 337

Stars—velocities of
Radial velocities of southern B stars determined at the Radcliffe Observatory—VII, *A. D. Thackeray, S. B. Tritton and E. N. Walker* (*Summary of Memoirs*, Volume 77, Part 5) ... 431

Sun
Anomalous ionization in the umbrae of sunspots, *D. E. Blackwell and E. A. Mallia* 61
Do helium inhomogeneities resolve the solar neutrino problem? *P. Demarque, J. G. Mengel and A. V. Sweigart* 19P

X-ray astronomy
Optical fluctuations of Scorpius X-1, *Alfred Frohlich* 313
Interstellar absorption of the low energy X-rays from the Crab Nebula, *P. A. Charles, J. L. Culhane and I. R. Tuohy* 355
Inverse Compton X-ray generation in QSS and the distance problem, *S. E. Okoye* 413
A synchrotron model for the continuum spectrum of the Crab Nebula, *B. J. Burn* 421
